

Iryna Barodzich

ASP.NET MVC Application

In order to setup the project, please do the following steps:

1. Download the folder content from
<https://github.com/IrynaBarodzich/ServiceStation>
2. Open project ServiceStation in MS Visual Studio 2012
3. Start debugging (Windows authentication is enabled, you need to enter your login and password)
4. Database dump is also in the source code directory but current Web.config settings use local database, which is located in the folder App_Data.

Software configuration: MS Visual Studio 2012, MSSQLQ 2012, .NET Framework 4.5, .NET Entity Framework.

For Client Search you can use the following data:

	ClientsID	LastName	FirstName
	1	Romov	Anton
	2	Molko	Alex
	3	Timov	Pavel
	4	Popov	Alex
	5	Gromova	Alina
	6	Ostrov	Vadim
	7	Homin	Maxim
	8	Krasko	Petr
	9	Nosova	Lisa
